GENERAL INDEX[1]

A

Absorption of hydrocyanic acid by Valencia-orange fruits and leaves fumigated at atmospheric pressure and at partial vacuum, 62

of water and nutrients by roots, effect of carbon dioxide on, 221

Acid, ascorbic, content of some vegetables, diurnal and seasonal changes in, 98

constituents of orange juice precipitated with lead acetate, 5

content of turnip greens, influence of mineral nutrition, soil fertility, and climate on, 540

hydrocyanic, absorption of, by Valencia-orange fruits and leaves fumigated at atmospheric pressure and at partial vacuum, 62

monochloracetic, used to include ammonia in the chlorate method for total nitrogen in plant tissue, 307

pyruvic, presence of, in Ebenezer onions, 461

Acidity and magnesium optimum; dibasal solution for *Aspergillus niger*, 600

of *Ananas comosus*, effects of potassium on, 652

Acids, organic, analysis of, of orange juice, 3

Actinomycetes in various parts of the potato and other plants, by B. F. LUTMAN, 695

Action, hormone, in geotropic response, changes in electrical polarity in the Avena coleoptile as an antecedent to, 133

Activity, photosynthetic, effect of copper and zinc deficiencies on, of the foliage of young tung trees, 283

respiratory, and duration of life of apples gathered at different stages of development, 467

Advances in protein chemistry, vol. 1, 1944, edited by M. L. ANSON and JOHN T. EDSALL, 165

Aerial and subterranean parts of the European bindweed, the effect of reduced light intensity on, 246

Aluminum toxicity: microchemical tests for inorganically and organically bound phosphorus, 310

Ammonia, in the chlorate method for total nitrogen in plant tissue, the use of monochloracetic acid to include, 307

Analysis, leaf, as an indicator of potassium requirement of cane fruits, 51

of the organic acids of orange juice, 3

Ananas comosus, effects of different amounts of potassium on growth and ash constituents of, 609

effects of potassium on chlorophyll, acidity, ascorbic acid, and carbohydrates, 652

Annual review of biochemistry, edited by JAMES MURRAY LUCK, 695

Apple, control of scald, by pre-storage carbon dioxide treatment, 313

varieties, quantitative study of ethylene production in, 633

Apples, respiratory activity and duration of life of, gathered at different stages of development, 467

Appreciation, CHARLES ALBERT SHULL, 1

ARNDT, C. H., Temperature-growth relations of the roots and hypocotyls of cotton seedlings, 200

Ascorbic acid content of some vegetables, diurnal and seasonal changes in, 98

of *Ananas comosus*, effects of potassium on, 652

of turnip greens, influence of mineral nutrition, soil fertility, and climate on, 540

Ash constituents and growth of *Ananas comosus*, effects of different amounts of potassium on, 609

Ashing procedures for the determination of copper in plant material, 79

Aspergillus niger, dibasal solution for, 600

Atmospheric pressure, fumigated at, absorption of hydrocyanic acid by Valencia-orange fruits and leaves, 62

Avena coleoptile, changes in electrical polarity in, as an antecedent to hormone action in geotropic response, 133

[1] Papers published in PLANT PHYSIOLOGY are indexed in The Agricultural Index, THE W. H. WILSON Co., New York.

electrical and curvature responses in, effect of mechanical stimulation on, 344

Causes of the flow of sap in red maples, observations on, 636
Cells, growing plant, respiration of, 448
CHANG, H. T., Effect of carbon dioxide on absorption of water and nutrients by roots, 221
Changes, chemical, in the onion under abnormal conditions, 44
occurring in the onion during normal growth, 39
diurnal and seasonal, in the ascorbic acid content of some vegetables, 98
in electrical polarity in the Avena coleoptile as an antecedent to hormone action in geotropic response, 133
Chemical testing of plant nutrient solutions by C. S. FAWCETT and R. H. STOUGHTON, 165
Chemistry and industry of starch, starch products and related compounds, 1944, by RALPH W. KERR, 167
and technology of food and food products, edited by M. B. JACOBS, 321
of heparin, 24
Chlorate, method for total nitrogen in plant tissue with the use of monochloracetic acid to include ammonia, 307
Chlorophyll, of *Ananas comosus*, effects of potassium on, 652
content, iron in the leaves and chloroplasts of some plants in relation to, 233
Chloroplasts, and leaves of some plants in relation to their chlorophyll content, iron in, 233
Citric acid content of orange juice, 10
Citrus trees, boron in, 323
CLARK, HARRY E., Leaf analysis as an indicator of potassium requirement of cane fruits, 51
Climate, mineral nutrition, and soil fertility, the influence of, on carotene and ascorbic acid content of turnip greens, 540
Coats, seed, a germination inhibitor in, of certain varieties of cabbage, 289
Coleoptile, Avena, changes in electrical polarity in, as an antecedent to hormone action in geotropic response, 133
Avena, electrical and curvature responses in, effect of mechanical stimulation on, 344
Composition, growth and biochemical, of bean plants as conditioned by soil moisture tension and salt concentration, 106
Concentration, salt, and soil moisture tension, growth and biochemical composition of bean plants as conditioned by, 106
Constant temperature, respiratory activity, and duration of life of apples maintained at, 467
Constituents, ash, of *Ananas comosus*, effects of different amounts of potassium on, 609
of Ebenezer onions at various stages of growth, 39
Content, ascorbic acid, of some vegetables, diurnal and seasonal changes in, 98
chlorophyll, iron in the leaves, and chloroplasts of some plants in relation to, 233
internal gas, and respiration of injured sweet-potato roots, 171
vitamin B, of buds and shoots of some common trees, 276
vitamin, of some mature and germinated legume seeds, 301
Control, of apple scald by pre-storage carbon dioxide treatment, 313
humidity, simple and effective, 443
Copper, effect of, and zinc deficiencies on the photosynthetic activity of the foliage of young tung trees, 283
impurities in distilled water, effect of, on growth of plants, 690
in plant material, determination of, ashing procedures for, 79
Cotton plant, carbohydrate utilization by, effect of light intensity, nitrogen supply, and fruiting on, 380
seedlings, temperature-growth relations of the roots and hypocotyls of, 200
Coumarin, inducing dormancy in lettuce seeds with, 433
COX, L. G., A germination inhibitor in the seed coats of certain varieties of cabbage, 289
Critical evaluation of the terminology of diffusion phenomena, 142
Crops, hunger signs in, edited by GOVE HAMBIDGE, 319

Curvature, and electrical, responses in the Avena coleoptile, effect of mechanical stimulation on, 344

D

Decapitated young bean plants, note on gall formation in, 453
Deficiencies, effect of copper and zinc, on the photosynthetic action of the foliage of young tung trees, 283
DENNISON, RAYMOND A., Growth and nutrient responses of Little Turkish tobacco to long and short photoperiods, 182
Determination of copper in plant material, ashing procedures for, 79
Development, different stages of, respiratory activity and duration of life of apples gathered at, 467
Diffusion phenomena, a critical evaluation of the terminology of, 142
  pressure gradient, 144
Distilled water, copper impurities in, effect of, on growth of plants, 690
Diurnal and seasonal changes in the ascorbic acid content of some vegetables, 98
DONNELLY, WINIFRED, The respiration of growing plant cells, 448
Dormancy, inducing, in lettuce seeds with coumarin, 433
  breaking of peach seed by treatment with thiourea, 505
Drought resistance in range and pasture grasses, 573
Duration of life and respiratory activity, of apples gathered at different stages of development and subsequently maintained at a constant temperature, 467

SHULL, CHARLES ALBERT, an appreciation, 1
SIDERIS, C. P., Effects of different amounts of potassium on growth and ash constituents of *Ananas comosus* (L.) Merr., 609
Effects of potassium on chlorophyll, acidity, ascorbic acid, and carbohydrates of *Ananas comosus* (L.) Merr., 649
Significance of the pH of blueberry leaves, 30
Simple and effective humidity control, 443
and inexpensive voltage regulator for laboratory use, 295
Simplified recording potentiometer, 258
SINCLAIR, WALTON B., Absorption of hydrocyanic acid by Valencia-orange fruits and leaves fumigated at atmospheric pressure and at partial vacuum, 62
Analysis of the organic acid of orange juice, 3
SMITH, E. A., A germination inhibitor in the seed coats of certain varieties of cabbage, 289
Soil fertility, mineral nutrition, and climate, the influence of, on carotene and ascorbic acid content of turnip greens, 540
moisture as percentage of dry soil, 111
moisture tension and salt concentration, growth and biochemical composition of bean plants as conditioned by, 106
potassium availability, 53
Soils, permanent wilting percentages of, obtained from field and laboratory trials, 517
Solution, dibasal, for *Aspergillus niger*, acidity and magnesium optimum, 600
Specific free energy, 148
Spray, transpiration-reducing, photosynthesis in maize as influenced by, 86
Starch and sugars of *Vitis vinifera*, 412
STEINBERG, ROBERT A., A dibasal solution for *Aspergillus niger;* acidity and magnesium optimum, 600
STEVENS, CLARK L., Observations on the causes of the flow of sap in red maple, 636
Stimulation, mechanical, effect of, on the electrical and curvature responses in the Avena coleoptile, 344
Storage, pre-, carbon dioxide treatment for control of apple scald, 313
Subterranean, and aerial parts of the European bindweed, effect of reduced light intensity on, 246
Sugar translocation, and wounding, 457
Sugars in the root of the carrot, 47
and starch, of *Vitis vinifera*, 412
Sweet-potato roots, injured, respiration and internal gas content of, 171

T

Temperature-growth relations of the roots and hypocotyls of cotton seedlings, 200
constant, respiratory activity and duration of life of apples maintained at, 467
Tension, soil moisture, and salt concentration, growth, and biochemical composition of bean plants as conditioned by, 106
Terminology of diffusion phenomena, a critical evaluation of, 142
Tests, microchemical, for inorganically and organically bound phosphorus, aluminum toxicity, 310
Thiourea, treatment with, breaking the dormancy of peach seed by, 505
THOMAS JEFFERSON and the scientific trends of his time, by CHARLES A. BROWN, 165
Tissues, plant, the use of monochloracetic acid to include ammonia in the chlorate method for total nitrogen, 307
Tobacco, Little Turkish, growth and nutrient responses of, to long and short photoperiods, 182
Tomatoes, and beets, some effects of boron and manganese on the quality of, 267
Total sugar content of maize leaves, 93
TOTTINGHAM, WM. EDWARD, 317
Toxicity, aluminum: microchemical tests for inorganically and organically bound phosphorus, 310
Translocation, sugar, and wounding, 457
Transpiration-reducing spray, photosynthesis in maize as influenced by, 86
Transplants, guayule, renewal of growth by, 137

Treatment, of pre-storage carbon dioxide, for control of apple scald, 313
with thiourea, breaking the dormancy of peach seed by, 505
Trees and toadstools, by M. C. RAYNER, 696
citrus, boron in, 323
some common, B vitamin content of buds and shoots of, 276
tung, effect of copper and zinc deficiencies on the photosynthetic activity of the foliage, 283
Trials, field and laboratory, permanent wilting percentages of soils obtained from, 517
TUKEY, H. B., Breaking the dormancy of peach seed by treatment with thiourea, 505
Tung trees, effect of copper and zinc deficiencies on the photosynthetic activity of the foliage, 283
Turgor pressure, 154
Turkish, Little, tobacco, growth and nutrient responses of, to long and short photoperiods, 183
Turnip greens, carotene and ascorbic acid content of, influence of mineral nutrition, soil fertility, and climate on, 540

U

Use of monochloracetic acid to include ammonia in the chlorate method for total nitrogen in plant tissue, 307
Utilization, carbohydrate, by the cotton plant, effect of light intensity, nitrogen supply, and fruiting on, 380

V

Vacuum, partial, fumigated at, and at atmospheric pressure, absorption of hydrocyanic acid by Valencia-orange fruits and leaves, 62
Valencia-orange fruits and leaves, absorption of hydrocyanic acid by, fumigated at atmospheric pressure and at partial vacuum, 62
Vapor pressure, 161
Varieties, of cabbage, certain, a germination inhibitor in the seed coats of, 289
apple, quantitative study of ethylene production in, 631
Vegetables, ascorbic acid content of some, diurnal and seasonal changes in, 98
VEIHMEYER, F. J., Permanent wilting percentages of soils obtained from laboratory and field trials, 517
VERDOORN, FRANS, Plants and plant science in Latin America, 694
Vitamin B, content of buds and shoots of some common trees, 276
content of some mature and germinated legume seeds, 301
Vitis vinifera, starch and sugars of, 412
Voltage regulator for laboratory use, a simple and inexpensive, 295
